PUTTURU SESHADRI

Bangalore, Karnataka, 560016 (+91) 7013679125 seshadrireddy1997@gmail.com

PROFESSIONAL SUMMARY

High-impact Senior Backend Engineer with experience architecting, building, and scaling enterprise cloud platforms handling high-throughput workloads. Core expertise in microservices architecture, event-driven systems, and caching mechanisms utilizing Java (8, 11, 17), Spring Boot, Kafka, and Redis. Proven track record of optimizing database query layers, resolving system bottlenecks, and implementing enterprise Generative AI integrations (AWS Bedrock) to boost developer velocity and system reliability.

TECHNICAL SKILLS

Backend & Systems:	Core Java (8, 11, 17), Spring Boot, Microservices Architecture, RESTful APIs, Spring Cloud Gateway, Service Discovery (Eureka), Design Patterns (Saga, CQRS), Resilience4j, Multithreading, JVM Profiling
Messaging & Caching:	Apache Kafka, RabbitMQ, Redis, Asynchronous Processing, Message Serialization
Databases & ORM:	PostgreSQL, MySQL, Schema Migration (Flyway), Redis Caching, HikariCP Connection Pooling, Query Optimization, Indexing
Cloud & DevOps:	AWS (Bedrock, EKS, EC2, S3, RDS, IAM, CloudWatch, Lambda - Upskilling), GCP, Azure, Docker Containerization, Kubernetes Pod Orchestration, Terraform, Jenkins CI/CD, Git, Maven, Gradle
AI & Security:	Agentic AI (Upskilling), AWS Bedrock, Claude AI, GitHub Copilot, Keycloak Identity Provider, OAuth 2.0, OpenID Connect (OIDC), Role-Based Access Control (RBAC)
Testing & Monitoring:	JUnit 5, Mockito, SonarQube, Prometheus, Jaeger

PROFESSIONAL EXPERIENCE

NTT DATA – Software Development Specialist

Bangalore, India | Aug 28, 2026 – Present

- **Enterprise Backend Engineering:** Architect and develop high-availability cloud microservices and scalable APIs using Java, Spring Boot, and AWS infrastructure.
- **Agentic AI Orchestration:** Active upskilling and implementation in AWS and Agentic AI workflows, designing multi-agent tool integrations and prompt engineering pipelines to automate operational reasoning.

ACCENTURE – Packaged App Development Analyst

Bangalore, India | Feb 24, 2022 – Aug 26, 2026

Project III: MyProduct Platform (Multi-Cloud IaaS & Cloud Operations)

Architected and optimized backend microservices for a multi-tenant cloud provisioning platform using Java 17, Spring Boot, and Spring Cloud Gateway.

- **Scalable Architecture:** Engineered scalable Spring Boot microservices to stream live multi-cloud operational metrics and execute high-throughput hardware computation requests.
- **Event-Driven Decoupling:** Integrated Kafka/RabbitMQ and Redis caching to decouple service dependencies, applying Resilience4j circuit breakers to handle traffic spikes and minimize database locks.
- **Database Optimization:** Optimized PostgreSQL schemas on AWS RDS via targeted indexing and HikariCP connection pool tuning, slashing API response latency to sub-hundred millisecond levels.
- **Seamless Migrations:** Executed version-controlled, zero-downtime database schema evolutions using Flyway across 15+ microservice deployment pipelines.
- **Generative AI Workflow Automation:** Architected and deployed an enterprise conversational assistant utilizing AWS Bedrock APIs, automating operational inquiries and significantly reducing manual ticketing load.
- **Container Orchestration:** Standardized Docker container deployments across 20+ Kubernetes pods using CI/CD pipelines, substantially cutting deployment failure rates.
- **Enterprise Security:** Implemented Keycloak identity management across endpoints using OAuth 2.0, OIDC protocols, and fine-grained Role-Based Access Control (RBAC).

PROFESSIONAL EXPERIENCE (CONTINUED)

Project II: Digital Solutioning Hub

Engineered a full-stack enterprise solutioning engine providing AI-driven tech stack recommendations and cost projections.

- **Microservices Domain Isolation:** Designed and implemented 5 independent Spring Boot microservices (API Gateway, Opportunity, Document, AI Agent, Assignment) ensuring domain isolation and scalability.
- **AI Recommendation Engine:** Integrated AWS Bedrock and Claude models to automate opportunity analysis, technology stack recommendations, effort estimations, and cost projections.
- **Dynamic Document Exports:** Built report generation engines utilizing Apache POI (PowerPoint) and Flying Saucer/CommonMark (PDF) to output executive-level presentations and reports.
- **Cloud Storage Pipeline:** Built secure AWS S3 document workflows supporting streaming-based file transfers, metadata tracking, and real-time upload/download progress updates.
- **Developer Velocity:** Leveraged AI-assisted development tools and prompt engineering for rapid component scaffolding and refactoring, significantly boosting sprint delivery velocity.

Project I: Hybrid Cloud Platform (ONE Bank)

Collaborated on a self-service provisioning platform across AWS, Azure, GCP, and On-Premises environments within an Nx monorepo.

- **Low-Latency Microservices:** Built RESTful microservices using Spring Boot to bridge interactive UI workflows with downstream cloud vendor provisioning engines.
- **Cloud Infrastructure Mapping:** Mapped backend APIs to AWS provisioning services (EC2, S3), enforcing strict IAM boundary policies for multi-tenant isolation.
- **API Standardization:** Formulated comprehensive endpoint specifications using Swagger/OpenAPI 3.0, ensuring seamless integration across distributed engineering teams.
- **Root-Cause Analysis:** Performed thread-dump diagnostics and log tracing on cloud provisioning exceptions, dramatically reducing deployment failure resolution time.

PROFESSIONAL CERTIFICATIONS

- Anthropic: Claude Certified Architect - Foundations
- Google Cloud: Associate Cloud Engineer
- Microsoft: Azure Developer Associate
- Microsoft: Azure Fundamentals (AZ-900)

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering
SV College of Engineering, Tirupati (Affiliated with JNTUA)
